

Special Area Classes

All classes will visit each special class once every 7 school days. If there is a holiday/snow day, will continue the schedule the day we return to school. For example, if we miss an “A” day, the next school day will be an “A” day.

Music

Ms. Williams

Students will focus on elementary music concepts. Music classes will be very active- singing, moving and playing instruments.

Art

Mr. Guthrie

Art classes will include projects that explore various art media. His teaching philosophy is one of “process over product” that encourages self expression.

Computer

Mrs. Comerford

All students will need to have headphones to participate in computer class. We will also be focusing on basic elementary computer skills.

Library

Mrs. Robinson

Our media center encourages students to become lifetime readers. We match books to readers, and students learn information and technological skills needed for the 21st century.

Practical Living

Mrs. Wiesner

All students will be learning how to live a healthy life in a variety of different aspects. The skills learned in this class are life-long skills for healthy living.

PE

Mrs. Freed

Safety is most important for students while participating in P.E. class. Please help keep students as safe as possible by making sure your child is wearing gym shoes when he/she has P.E.

World Culture

Mrs. Francis

Students will explore the many interesting cultures of the world. They will also be learning some basic Spanish.
